

IN THE CLAIMS:

The following listing of claims replaces all previous listings and versions:

1. (Currently Amended) A system for storing and accessing information units, the system comprising:

at least one storage device for storing ~~respective ones of the~~ information units;

at least one presentation device for presenting the information units; and

a network connecting the storage device and the presentation device, wherein an a ~~respective information unit of the information units can be~~ is assigned to a ~~physical~~ location; ~~[[,]]~~
the system further comprising

positioning means for determining a ~~the~~ physical location of the presentation device; ~~[[,]]~~ and

presentation control means for controlling the presentation of the a ~~respective~~ information unit in dependence on the physical location of the presentation device and on the location to which the ~~respective~~ information unit is assigned such that a full presentation of the information unit is permitted when the physical location of the presentation device and the location to which the information unit is assigned are substantially equal, and a limited presentation of the information unit is permitted when a relatively small distance separates the physical location of the presentation device and the location to which the information unit is assigned.

2-3. (Canceled)

4. (Currently Amended) The system as claimed in claim 1, the presentation control means being arranged to prohibit presentation of the an information unit if there is a relatively large distance between the physical location of the presentation device and the location to which the ~~respective~~ information unit is assigned.

5. (Currently Amended) The system as claimed in claim 1, the presentation device being a portable device.

6. (Currently Amended) The A system as claimed in claim 1, the presentation device being capable of creating and/or modifying the an information unit which is assigned to the current physical location of the presentation device.

7. (Currently Amended) The A system as claimed in claim 1, the network being at least partly a wireless network.

8. (Original) A presentation device for use in a system as claimed in claim 1.

9. (Currently Amended) The A presentation device as claimed in claim 8, comprising positioning means for determining the physical location of the presentation device.

10. (Currently Amended) The A presentation device as claimed in claim 9, said positioning means comprising a Global Positioning System unit.

11. (Currently Amended) The A presentation device as claimed in claim 8, comprising presentation control means for controlling the presentation of the a ~~respective~~ information unit in dependence on the physical location of the presentation device and on the location to which the respective information unit is assigned.

12. (Currently Amended) The A presentation device as claimed in claim 8, the presentation device being a portable device.

13. (Currently Amended) The A presentation device as claimed claim 8, the presentation device being capable of creating and/or modifying an information unit which is assigned to the current physical location of the presentation device.

14. (Currently Amended) A method of storing and accessing information units, the method comprising:

~~the steps of storing respective ones of the information units by means of at least one storage device;~~

~~presenting respective ones of an information unit of the information units by means of at least one presentation device;~~ and

~~connecting the storage device and the presentation device by means of a network;~~
~~wherein the method further comprises the steps of~~

~~assigning each an information unit to a physical location;~~

~~determining a the physical location of the presentation device;~~ and

~~controlling the presentation of the a respective information unit in dependence on the physical location of the presentation device and on the location to which the respective information unit is assigned, such that a full presentation of the information unit is permitted when the physical location of the presentation device and the location to which the information unit is assigned are substantially equal, and a limited presentation of the information unit is permitted when a relatively small distance separates the physical location of the presentation device and the location to which the information unit is assigned.~~

15. (Previously Presented) A computer program product enabling a computer, when executing said computer program product, to function as a presentation device as claimed in claim 8.
